Pharmaceutical and Medical Grade Polyethylene film – Mix 150

Mix 150 is a Pharmaceutical and Medical grade polyethylene film used during the loading, storage and transportation of raw materials, including fine powder chemicals, tablets, soft and hard capsules.

Technical Data:

Mix 150 is an additive free, high purity polyethylene film which is effective for the particular needs of the Pharmaceutical and Medical Industries as it meets the requirements of FDA Title 21 paras. 177.1520 and 176.170. Mix 150 is of high economic use as it can be manufactured in a range of thicknesses, widths, and lengths.

Physical Properties:

Base Colour	Clear to Slight Haze
Thickness	Ranging from 50 to 200 um (Micron)
Tensile Strength MD/TD (MPa) (ISO 527-3)	27/22
Tear Resistance MD/TD (kN/m) (ISO 6383-3)	35/40

Mix 150 is available as bags, sacks, liners, continuous tubing, and hoods

The values shown above were produced from testing film samples produced by the granule manufacturer. We believe them to be typical for this particular product. Because of normal lot to lot variations, actual values may vary somewhat from these depicted here. John C. Brow Ltd T/A Brow Packaging makes no warranty, express or implied, as to the suitability of these materials for any specific product. Consumers should determine product suitability through their own testing and evaluation.
